CO2Lift Carboxy Mousse Moisturizer

CO2Lift Carboxy Mousse Moisturizer

To produce CO2 gas, the following ingredients are used: Sodium Bicarbonate, Ammonium Glycolate, Lactic Acid, Salicylic Acid.

How long does this last? Approximately 120 faces

Enjoy fresh CO2 every time you use.

It contains special beauty components which are normally difficult to be compounded. As this is an aerosol type, we are able to compose Pure Vitamin C and Linoleic Acid. These 2 components could easily oxidize so very difficult to be compounded in cosmetics. They bring glow to the skin while blocking melanin production

3 kinds of Vitamin C and Linoleic Acid helps to create radiant skin- 12 kinds of plant extracts makes your skin hydrate and glow- 10 kinds of active beauty components makes your skin smooth and supple

Directions: Apply directly to concerned areas, leave on for 5 minutes then spread all over face and neck.
